While Adobe has published the CC download links on the Creative Cloud desktop app and various websites, its not making the new Lightroom installer available on its site. CC 2019 licensees will have to use Adobes downloadable installer to get the new CC app. In other words, we cannot post the new Lightroom installer at Adobe.com. This is not a bug and its not our fault. We want to make sure everyone has as much information as they can and its not our job to supplement or add to Adobes own site. If you want the installer, youll have to download it from Adobe directly or get it directly from the Creative Cloud account. Please let us know if you find any issues with the installation.
