## What's New in the?

One Click Article Scraper is an easy to use software utility whose main purpose is to provide you with a quick means of finding articles on the web on a certain topic, then download the contents to your computer and modify them using synonyms to generate an original piece. Once you have launched One Click Article Scraper, you can enter the keyword you want to use into the indicated field and click on the 'Search' button. Following a short period of time, during which the tool finds the relevant articles, you will be able to view the retrieved texts, along with the title and the source URL address. One Click Article Scraper can retrieve up to 1000 items, allowing you to choose whichever you want. However, in the case of numerous results, you might be required to enter a Captcha string, in order for the utility to finalize the operation. This is apparently cause by the increased amount of traffic on your network, as such, you should try and make your keyword and expressions as targeted as possible. By right-clicking on one of the items in the list of results, you can 'Preview And Download The Article', which will then be displayed in the 'Edit Article' section of One Click Article Scraper. There, you can select individual words and view the synonym suggestions provided by the program. Other functions include 'Copy', 'Paste' and 'Cut', but you can also type in bits of text. You should keep in mind that you can only work with one article at a time, so you cannot open multiple tabs and switch back and forth between them. When you are done, you can save the file to you PC to TXT format. By visiting you confirm that you read and agree to our terms & conditions, privacy policy and cookie policy. Description: One Click Article Scraper is an easy to use software utility whose main purpose is to provide you with a quick means of finding articles on the web on a certain topic, then download the contents to your computer and modify them using synonyms to generate an original piece.
