Key generator crack Q: Angular 2 - Saving data I'm trying to save the data in my array after clicking on a button. Inside my template, I have a button and a field for input. save Here is the corresponding method inside my ts file : `save(){ this.mylist.mydata = this.mylist.mydata.filter(mydata => { return mydata.mylist.mydata.indexOf(this.list.mydata)!== -1 }); }` Here is my list with the filter on my data : `{{ mydata.mylist.mydata }}` When the data is displayed, everything works fine and the list is filtered. But then, when I click on the save button, nothing happens and the list is always displayed the way it was before. I debugged it and my data is lost when I update the array using the `*ngFor` property. Any idea how to save my data? A: Hi try this : `{{ mydata.mylist.mydata }}` in your class : `save(){ this.mylist.mydata = this.mylist.mydata.filter(mydata => { return mydata.mylist.mydata.indexOf(this.list.mydata)!== -1 }) }` or `save(){ this.mylist.mydata = this.mylist.mydata.filter(this.mylist.mydata.map(mydata => { return mydata.mylist.mydata })), mydata => {`
